Assignment # 1

श्रूल जर विजलप्र

BBA 8338

Bangladesh Open University

BBA Program

Semester: 202 (8th Level)

Course Title: Financial Statements Analysis Date: November 25, 2022

Instructions

- Answer all questions in your <u>own handwriting</u> on <u>A4 size white paper</u>.
- Fill-in the <u>cover page of your assignment</u> with care.
- Enclose the <u>photocopy of your ID Card</u> with the assignment (next to the cover page).
- ➤ <u>Don't make spiral binding</u>. Instead, make soft binding.
- Submit the assignment to the respective course tutor and ensure his/her <u>signature</u> on your Assignment Acknowledgement Form (see page#4 of Semester Calendar).

Questions

- 1. (a) How do the direct and the indirect methods differ in their approach to computing the net cash provided by operating activities?
 - (b) Assume that a company repays a Tk. 300,000 loan from its bank and then later in the same year borrows Tk. 500,000. What amount(s) would appear on the statement of cash flows?
 - (c) The income statement for the year ended December 31, 2021, for Anis Manufacturing Company contains the following condensed information.

ANIS MANUFACTURING COMPANY

Income Statement

For the Year Ended December 31, 2021

Revenues		Tk.6,583,000
Operating expenses (excluding depreciation)	Tk.4,920,000	
Depreciation expense	880,000	5,800,000
Income before income taxes		783,000
Income tax expense		353,000
Net income		Tk. 430,000

Included in operating expenses is a Tk.24,000 loss resulting from the sale of machinery for Tk.270,000 cash. Machinery was purchased at a cost of Tk.750,000.

The following balances are reported on Anis's comparative balance sheets at December 31:

ANIS MANUFACTURING COMPANY

Comparative Balance Sheets (partial)

	<u>2021</u>	<u>2020</u>
Cash	Tk.672,000	Tk.130,000
Accounts receivable	775,000	610,000
Inventories	834,000	867,000
Accounts payable	521,000	501,000

Income tax expense of Tk.353,000 represents the amount paid in 2021. Dividends declared and paid in 2021 totaled Tk.200,000.

Required

Prepare the statement of cash flows using the indirect method.

- 2. (a) A company seeking a line of credit at a bank was turned down. Among other things, the bank stated that the company's 2 to 1 current ratio was not adequate. Give reasons why a 2 to 1 current ratio might not be adequate.
 - (b) The financial statements for Castile Products, Inc. are given below:

Castile Products, Inc.

Balance Sheet December 31

Assets

Current assets:		
Cash	Tk. 6,500	
Accounts receivable, net	35,000	
Merchandise inventory	70,000	
Prepaid expenses	3,500	
Total current assets	115,000	
Property and equipment, net	185,000	
Total assets	Tk. 300,000	
Liabilities and Stockholders' Equity		
Liabilities:		
Current liabilities	Tk. 50,000	
Bonds payable, 10%	80,000_	
Total liabilities	130,000	
Stockholders' equity:		
Common stock, Tk. 50 par value	Tk. 30,000	
Retained earnings	140,000_	
Total stockholders' equity	170,000	
Total liabilities and equity	Tk. 300,000	

Castile Products, Inc.

Income Statement
For the Year Ended December 31

Sales	Tk. 420,000
Cost of goods sold	292,500
Gross margin	127,500
Selling and administration expenses	89,500
Net operating income	38,000
Interest expense	8,000_
Net income before taxes	30,000
Income taxes (30%)	9,000_
Net income	Tk21,000

Account balances at the beginning of the year were: accounts receivable, Tk. 25,000, and inventory, Tk.60,000. All sales were on account

Required:

Compute the following:

(i) Gross margin percentage

- (ii) Current ratio
- (iii) Acid-test ratio
- (iv) Debt-to-equity ratio
- (v) Average collection period
- (vi) Average sale period
- (vii) Times interest earned ratio
- (viii) Book value per share.
- 3. (a) When a lease is considered an operating lease for both the lessor and the lessee, describe what amounts will be found on the balance sheets of both the lessor and the lessee related to the lease obligation and the leased asset.
 - (b) On January 1, Year 8, Apex Company entered into two noncancellable leases of new machines for use in its manufacturing operations. The first lease does not contain a bargain purchase option and the lease term is equal to 80% of the estimated economic life of the machine. The second lease contains a bargain purchase option and the lease term is equal to 50% of the estimated economic life of the machine.

Required:

- (i) Explain the justification for requiring lessees to capitalize certain long-term leases. Do not limit your discussion to the specific criteria for classifying a lease as a capital lease.
- (ii) Describe how a lessee accounts for a capital lease at inception.
- (iii) Explain how a lessee records each minimum lease payment for a capital lease.
- (iv) Explain how Apex should classify each of the two leases. Provide justification.

BBA 8338

Bangladesh Open University

BBA Program

Semester: 202 (8th Level)

Course Title: Financial Statements Analysis Date: December 23, 2022

Instructions

- Answer the all questions in your <u>own handwriting</u> on <u>A4 size white paper</u>.
- Fill-in the <u>cover page of your assignment</u> with care.
- Enclose the photocopy of your ID Card with the assignment (next to the cover page).
- > Don't make spiral binding. Instead, make soft binding.
- Submit the assignment to the respective course tutor and ensure his/her signature on your Assignment Acknowledgement Form (see page#4 of Semester Calendar).
- 1. (a) Discuss the significance of the operating cycle to the classification of current versus noncurrent items in a balance sheet. Cite examples.
 - (b) Sports Biz, a profitable company, built and equipped a Tk. 2,000,000 plant brought into operation early in Year 1. Earnings of the company (before depreciation on the new plant and before income taxes) are projected at Tk. 1,500,000 in Year 1, Tk. 2,000,000 in Year 2, Tk. 2,500,000 in Year 3, Tk. 3,000,000 in Year 4, and Tk. 3,500,000 in Year 5. The company can use straight-line, double-declining-balance, or sum-of-the-years'-digits depreciation for the new plant. Assume the plant's useful life is 10 years (with no salvage value) and an income tax rate of 50%.

Required:

Compute the separate effect that each of these three methods of depreciation would have on:

- (i) Depreciation
- (ii) Income taxes
- (iii) Net income
- (iv) Cash flow (assumed equal to net income before depreciation)
- 2. (a) Describe the accounting treatment for speculative derivatives.
 - (b) Cited here are four unrelated cases involving marketable equity securities:
 - (i) A noncurrent portfolio of available-for-sale equity securities with an aggregate market value in excess of cost; includes one particular security whose market value has declined to less than one-half of the original cost.
 - (ii) The balance sheet of a company does not classify assets and liabilities as current and noncurrent. The portfolio of available-for-sale equity securities includes securities normally considered current that have a net cost in excess of market value of Tk. 2,000. The remainder of the portfolio has a net market value in excess of cost of Tk. 5,000.

- (iii) An available-for-sale marketable equity security, whose market value is currently less than cost, is classified as noncurrent but is to be reclassified as current.
- (iv) A company's noncurrent portfolio of marketable equity securities consists of the common stock of one company. At the end of the prior year, the market value of the security was 50% of original cost, and this effect was properly reflected in a Valuation Adjustment account. However, at the end of the current year, the market value of the security had appreciated to twice the original cost. The security is still considered noncurrent at year-end.

Required:

For each of the cases, describe how the information provided affects the classification, carrying value, and income reported for that company's investment securities.

- 3. (a) Describe aspects of revenue recognition that an analyst must be especially alert to.
 - (b) An analyst must be familiar with the concepts involved in determining income. The amount of income reported for a company depends on the recognition of revenues and expenses for a given time period. In certain cases, costs are recognized as expenses at the time of product sale; in other situations, guidelines are applied in capitalizing costs and recognizing them as expenses in future periods.

Required:

- (i) Explain the rationale for recognizing costs as expenses at the time of product sale.
- (ii) What is the rationale underlying the appropriateness of treating costs as expenses of a period instead of assigning the costs to an asset? Explain.
- (iii) Under what circumstances is it appropriate to treat a cost as an asset instead of as an expense? Explain.
- (iv) Certain expenses are assigned to specific accounting periods on the basis of systematic and rational allocation of asset cost. Explain the underlying rationale for recognizing expenses on this basis.
- (v) Identify the conditions necessary to treat a cost as a loss.

Assignment # 1 BBA 8341
